

Walking sequencing

Above is a similar machine to the one's that are to be introduced into the Bradford South Deliver Office. These machines are capable of sorting mail into walk order. This means less indoor work and will certainly lead to later start times, in most instances. At the moment the offices that are to be sequenced are Halifax, Cleckheaton, Hebden Bridge and Bradford south.

New Duty Structures

The CWU aims to maximise full-time working whilst keeping a balance of part-time. We also wish to have duty structures that delivery better attendance patterns that give people more time away from work. This can be done through 4 day/ 6 day/ 5 day/ 2 day working. Your input and advice is crucial, we will keep informed at all stages.
